

Anchit Bhushan

Work Experience

Infosys Limited

Bengaluru, India

Senior Associate Consultant (*Helix*)

August 2024 – Present

- Engineered high-throughput **ETL pipelines** orchestrating bidirectional data exchange between **SFTP** and **Azure**, processing **~10K EDI 834** files daily — demonstrating end-to-end pipeline design for large-scale structured data exchange formats with robust error handling and reliability.
- Designed and deployed **8 scalable backend microservices** exposing **60+ REST endpoints** on a multi-tenant enterprise healthcare platform, optimized for high-throughput and low-latency global operations.
- Built containerized infrastructure using **Docker** and **Kubernetes**, implementing **Helm**-based release management with ConfigMaps and Secrets for secure, repeatable multi-environment deployments.
- Triaged and resolved production system issues by analyzing root causes across service, network, and infrastructure layers, restoring system performance and minimizing operational impact at scale.

FIS Solutions (India) Private Limited

Bengaluru, India

Software Engineer (*Global Plus – Wealth Management*)

July 2021 – Jan 2024

- Built and enhanced inbound/outbound **SWIFT** financial data exchange pipelines using **Java** and **Spring**, processing large-scale structured **financial message formats** for multiple global banking clients across distributed systems.
- Optimized system performance and resolved complex defects in **C** and **FORTRAN** on a large-scale Wealth Management platform (**State Street**), diagnosing issues at system and network layers to meet stringent reliability requirements.
- Designed a **data integration pipeline** to export structured **XML** data between **Windows Server**-hosted **.NET** services, improving cross-system data transfer reliability and throughput.

Accenture Solutions Pvt Ltd

Bengaluru, India

Application Development Associate (*OSISoft PI*)

November 2020 – April 2021

- Supported real-time manufacturing data collection and warehousing via **OSISoft PI Data Historian**, a time-series data platform — gaining hands-on exposure to **real-time data ingestion**, **data integrity**, and operational continuity for a pharmaceutical client.
- Built foundational skills in **Python**, **Java**, and **C** through structured training in **SDLC**, **Agile**, and **DevOps**, applied directly to production data systems.

Datalore Labs Private Limited

Bengaluru, India

Machine Learning Intern

July 2019 – August 2019

- Built and evaluated ML classification pipelines (KNN, Logistic Regression, Decision Tree, Random Forest) on audio feature datasets, performing **feature engineering** and **model selection** to predict Parkinson's disease probability.
- Improved model accuracy from **89.79%** to **99.04%** through hyperparameter tuning — demonstrating applied ML optimization and data-driven decision-making.

Skills

Languages: Python, Java, SQL, C, C++, FORTRAN

Tools / Services: Git, Docker, Kubernetes, Azure, Helm, SFTP, EDI, XML, .NET, CI/CD

Libraries / Frameworks: Spring / Spring Boot

Concepts: ETL Pipelines, Data Engineering, Data Modeling, Distributed Systems, Large-Scale System Design, High-Throughput Scalability, REST APIs, Microservices

AI / Developer Tools: GitHub Copilot, Claude Code

Education

Dayananda Sagar Academy of Technology & Management (DSATM)

Bengaluru, India

B.E., Information Science & Engineering | CGPA: 7.51/10

2016 – 2020

Honors & Achievements

2025 At Infosys Ltd., received a certificate for exceptional dedication, outstanding contributions, and exemplary performance.

2022 At FIS Solutions (India) Pvt. Ltd., received a Kudos award for singlehandedly delivering the IV Gen3 server migration.
