Senior Java Backend Engineer with 4+ years of experience designing and building scalable, production-grade backend systems and RESTful APIs using **Java** and **Spring Boot**. Proven track record in microservices architecture, distributed system integrations, containerized deployments, and mentoring engineering teams. Strong focus on clean service design, system reliability, and raising engineering quality standards.

Work Experience

Infosys Limited

Bengaluru, India

Senior Associate Consultant (Helix)

August 2024 – Present

- Designed and built production-grade **RESTful** APIs using **Java** and **Spring Boot**, establishing clean service boundaries, well-defined API contracts, and integration patterns across cross-domain **microservices** architectures.
- Architected high-throughput **SFTP-to-Azure** data pipelines using Spring Scheduler, processing **~10K EDI 834** files daily with retry logic, structured error handling, and end-to-end operational reliability.
- Owned containerized deployments using **Docker** and **Kubernetes** with **Helm**-based release management; implemented observability and monitoring for secure multi-environment production systems.
- Drove **code reviews** and provided architectural guidance to 3 engineers, enforcing Clean Code principles, reducing technical debt, and raising backend engineering standards across the team.

FIS Solutions (India) Private Limited

Bengaluru, India

Software Engineer (Global Plus – Wealth Management)

July 2021 – Jan 2024

- Designed and implemented backend services for **SWIFT** Standards Update 2023 compliance, delivering reliable inbound and outbound financial message processing with improved integration correctness at scale.
- Built and maintained backend systems for a **Wealth Management** platform serving multiple banking clients; performed production troubleshooting, root cause analysis, and long-term fixes to improve system reliability and performance.
- Designed a dual push integration mechanism to transfer files between **Windows Server**-hosted applications via **XML**, improving cross-system data flow reliability and reducing integration failure rates.

Accenture Solutions Pvt Ltd

Bengaluru, India

Application Development Associate (OSISoft PI)

November 2020 – April 2021

- Completed structured training in **Java**, **Python**, **SDLC**, **Agile**, and **DevOps**, building a strong foundation in backend development and software engineering practices.
- Provided application support for real-time data collection using OSISoft PI **Data Historian** for a **Pharmaceutical** client, ensuring data integrity and system continuity in a production environment.

Datalore Labs Private Limited

Bengaluru, India

Machine Learning Intern

July 2019 – August 2019

- Predicted the probability of Parkinson's Disease from audio feature samples using multiple ML models including KNN, Logistic Regression, Decision Tree, and Random Forest.
- Improved prediction accuracy from **89.79%** to **99.04%** by tuning a Decision Tree classifier.

Skills

Languages: Java (primary), Python, C, C++

Frameworks: Spring Boot, Spring MVC, Spring Data, Spring Scheduler

Backend: RESTful API Design, Microservices, Distributed Systems, Service Integration, Event-Driven Patterns

Databases: SQL, Relational Database Design, Data Modeling

DevOps / Cloud: Docker, Kubernetes, Helm, Azure, CI/CD, ConfigMaps & Secrets

Tools: Git, SFTP, EDI, XML

AI / Developer Tools: GitHub Copilot, Claude Code

Honor & Achievements

2025 At Infosys Ltd. Bangalore, Received certificate for exceptional dedication, outstanding contributions and exemplary performance.

2022 At FIS Solutions (India) Pvt. Ltd. Bangalore, Received Kudos award for sole contribution towards IV Gen3 Server migration.
